

## CHEVRON COLLECTION

ARCHITECTURAL CHEVRON: 7" x 40.2" | TRANSITIONAL CHEVRON: 5" x 30.5"  
(STANDARD SPECIFICATION)

### THE ULTIMATE IN DESIGN FLEXIBILITY

Our customers value the freedom of expression for creative designs, so we have made it possible to order every colour in our palette as a chevron pattern. Whether it's the beautiful taupe of a Turin Walnut or the rich brown of a hand textured Aragon Hickory, the multitude of options available for chevron provide a new avenue for creative expression

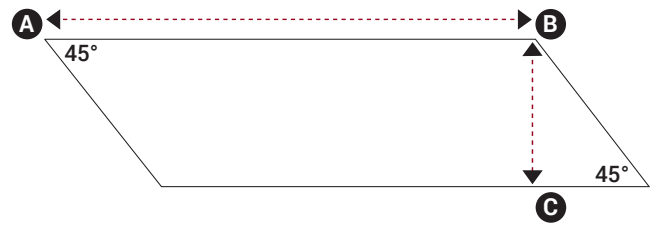

### COMPATIBILITY WITH REGULAR PLANK

All chevron planks are milled, textured and finished to be a perfect match to our straight plank flooring. This allows designers to use chevron in some spaces, with straight plank flooring used in other adjoining spaces, and maintaining perfect consistency throughout

### COMMITMENT TO SUSTAINABILITY

Architectural Chevron flooring is made with the same materials and by the same team that makes our straight plank flooring. In support of safe and healthy living spaces, they meet stringent standards as shown by our Declare label with Red List Free designation (for CRAFT) and GREENGUARD Gold certification (for both CRAFT and UrbanWood). Like our regular planks, Architectural Chevron use only certified sustainable North American wood, underscoring the importance of sustainable sourcing (for CRAFT)

### 2 AVAILABLE SPECIFICATIONS

CRAFT manufactures chevron in two specifications:

#### ARCHITECTURAL CHEVRON (STANDARD SPEC.):

**Dimensions:** 7" (178mm) x 40.2" (1,022mm) x 5/8" (15mm). Length measured as A to B; width measured as B to C, as shown on the diagram

**Construction:** 3mm solid sawn veneer on a DACS III construction.

**Packaging:** Boxes contain 8 boards of Architectural Chevron.

**Box Contents:** 15.7 sqft (1.46 sqm) per box. Planks in "A" boxes have tongues on the top end and left side; Planks in "B" boxes have tongues on the top end and right side

#### TRANSITIONAL CHEVRON:

**Dimensions:** 5" (127mm) x 30.5" (775mm) x 5/8" (15mm). Length measured as A to B; width measured as B to C, as shown on the diagram

**Construction:** 3mm solid sawn veneer on a plywood construction

**Packaging:** Boxes contain 16 boards of Transitional Chevron.

**Box Contents:** 17.0 sqft (1.57 sqm) per box. Planks in "A" boxes have tongues on the top end and left side; Planks in "B" boxes have tongues on the top end and right side

**Waste Factor:** Due to the complexities of chevron installations, it is recommended to use a waste factor of 15% for most projects

**Availability:** All chevron flooring is made-to-order with an 8-14 week lead time. Please contact your sales rep for a more specific estimation of lead times
