

CRAFT CHEVRON

Chevron flooring enhances the visual appeal of beautiful spaces, creating a sense of sophistication and style.

ARCHITECTURAL CHEVRON: 7" x 40" | TRANSITIONAL CHEVRON: 5" x 30"

THE ULTIMATE IN DESIGN FLEXIBILITY

CRAFT customers value the freedom of expression for creative designs, so we have made it possible to order every colour in the CRAFT palette as a Chevron pattern. Whether it's the beautiful taupe of a Turin Walnut or the rich brown of a hand textured Aragon Hickory, the multitude of options available for CRAFT Chevron provide a new avenue for creative expression.

COMPATIBILITY WITH STRAIGHT PLANK FLOORING

All of CRAFT's Chevron planks are milled, textured and finished to be a perfect match to CRAFT's straight plank flooring. This allows designers to use Chevron in some spaces, with straight plank flooring used in other adjoining spaces, and maintaining perfect consistency throughout.

OUR COMMITMENT TO SUSTAINABILITY STANDS

CRAFT Architectural and Transitional Chevron are made with the same materials, by the same teams, in the same factory. Therefore, specifiers can rest assured that CRAFT's Chevron will contribute to safe and healthy living spaces as attested by our Declare label with Red List Free designation and GREENGUARD Gold ultra-low VOC certification. As with all of CRAFT's straight plank flooring, our Architectural and Transitional Chevron are made only with certified sustainable North American wood, because when it comes to any wood product, the sustainability of the source really matters.

2 AVAILABLE SPECIFICATIONS

CRAFT manufactures Chevron with a choice of two different specifications:

ARCHITECTURAL CHEVRON:

Dimensions: 7" (178mm) x 40" (1,022mm) x 5/8" (15mm). Length measured as A to B; width measured as B to C, as shown on the diagram.

Construction: 3mm solid sawn lamella on a DACS III construction.

Packaging: Boxes contain 8 boards of CRAFT Architectural Chevron.

Box Contents: 15.7 sqft (1.46 sqm) per box. Planks in "A" boxes have tongues on the top end and left side; Planks in "B" boxes have tongues on the top end and right side.

TRANSITIONAL CHEVRON:

Dimensions: 5" (127mm) x 30" (775mm) x 5/8" (15mm). Length measured as A to B; width measured as B to C, as shown on the diagram.

Construction: 3mm solid sawn lamella on a DACS III construction.

Packaging: Boxes contain 16 boards of CRAFT Transitional Chevron.

Box Contents: 17.0 sqft (1.57 sqm) per box. Planks in "A" boxes have tongues on the top end and left side; Planks in "B" boxes have tongues on the top end and right side.

Waste Factor: Due to the complexities of Chevron installations, it is recommended to use a waste factor of 15% for most projects.

Availability: All CRAFT Chevron flooring is made-to-order with an 8-14 week lead time. Please contact your sales rep for a more specific estimation of lead times.
