CRAFT, IT'S OUR NATURE

PEOPLE & PLANET

The world of building materials is teeming with empty marketing claims and greenwashing. CRAFT realizes that the only way to prove its commitment to making flooring in a healthy and sustainable manner is to subject its products to rigorous third-party testing and certifications. And that's why our commitment to transparency and sustainable manufacturing is backed up by stringent disclosure and independent analysis.

OUR CRAFT

Recognized as one of the most unique brands available in the market, CRAFT embraces the principles of artisanal wood crafting, and is dedicated to creating uncommonly beautiful wood floors. CRAFT is the only major brand fully committed to only using wood from certified sustainable sources for 100% of its products. All products are GREENGUARD® Gold certified to have ultra-low VOC emissions, and have a Declare label stating that they are made entirely from Red List Free materials.

CRAFTED FOR BEAUTY

The soul of every CRAFT floor is animated by the principles of biophilic design, with the goal of enriching peoples' lives through a connection to nature and the beautiful colours and textures found only in real wood. CRAFT devotes relentless attention to the details of wood craftsmanship and the artistry required to create nuanced tones and textures – giving every CRAFT floor an authentic, organic feel.

WHO IS CRAFT FOR?

CRAFT is beloved by professionals and discerning homeowners for its artisanal approach to wood craftsmanship. Customers also value CRAFT's leadership in responsible wood sourcing, healthy and sustainable manufacturing, and its commitment to product transparency. Because sustainability and beauty are meaningful only when they are attainable, CRAFT has worked hard and smart to ensure that its beautiful and sustainable floors are affordable enough to be within budget for most projects.

SUSTAINABLE WOOD

All CRAFT floors are made from wood that is third-party certified to have come from sustainably managed forests.

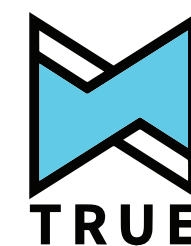

to present the option of certified wood, but then require the specifier or homeowner to make a "special request" in order to ensure sustainable sourcing for their products. Only CRAFT has made the commitment to offer certified sustainable wood as its standard and only option.

This is incredibly important because a surprisingly large amount of the wood used to make engineered wood flooring comes from forest-damaging, unsustainable sources. It is a norm within the wood flooring industry for manufacturers

GREEN MANUFACTURING

CRAFT's floors are made in a fully-owned manufacturing facility with a rooftop solar farm that supplies a substantial amount of the facility's needs with green, renewable energy.

The facility was designed and built to maximize efficiency and minimize waste, and is currently pursuing TRUE Zero Waste certification.

HEALTHY HOME

The International Living Future Institute developed the Declare program to shape a transparent materials economy and to encourage a shift towards the use of healthier building materials.

Declare.

found in building products that have been identified as being toxic for people, the environment and the workers that make the products. Declare is a program that seeks to eliminate the use of these commonly found "worst in class" chemicals through transparency and full disclosure of ingredients. CRAFT is one of the only wood flooring manufacturers in the world to have achieved a Declare label, and is proud to state that all of its products have been designated the highest level of Red List Free.

There are thousands of chemicals commonly

Red List Free

GREENGUARD Gold is a certification program operated by Underwriter Laboratories (UL) and designed to certify that building products are low-emitting with respect to VOCs.

GREENGUARD Gold offers the most stringent standard for VOC testing, and sets the thresholds so low that it has become the testing standard required for materials used in hospitals and schools. All CRAFT floors are GREENGUARD Gold certified.

ENVIRONMENTAL REPORTING

An Environmental Product Declaration, known as an EPD, is a detailed Life Cycle Assessment (LCA) that quantifies environmental information on the life cycle of a product.

impacts. The process of getting CRAFT's EPD has given us a deep-level understanding of the environmental impacts from making our products, and helps us to set a course for making future improvements that will enable us to lighten our environmental footprint.

All of CRAFT's certifications and environmental statements have been independently verified by Vertima in a Validated Eco-Declaration.

This information is useful in helping specifiers understand how CRAFT's products contribute to earning points within LEED® v4.

Search CRAFT at: www.origin.build
The source documentation for all of CRAFT's certifications can be found in the **mindful MATERIALS** online database.

OUR HICKORY

Origin: North Eastern USA

Hickory is the hardest North American wood used for flooring. Through the many years of experience in working with North American hardwoods, the CRAFT team has developed a deep love for and appreciation of Hickory. CRAFT homeowners love its resilience and its natural wood feeling, making Hickory the #1 wood species that we use for our floors.

From our craftsmen's perspective, the most unique aspect of Hickory is the beautifully distinct patterns that result from the wood's varying grain pattern, which features more sapwood than that found in other species such as Oak or Walnut.

ZEN

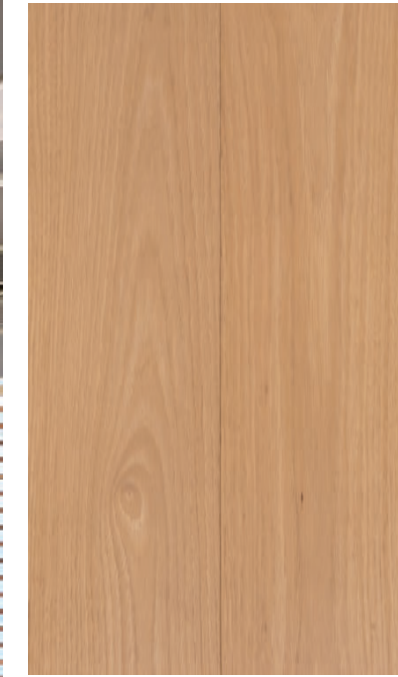

ORGANIC, LIGHT AND NATURAL
WIDE PLANK HICKORY

The exquisite Zen Collection offers a calming refuge from a hectic world. This unique collection is distinguished by lighter hues and showcases the organic patterns inherent in our finest Elite Grade Hickory floors.

OUR OAK

Origin: North Eastern USA

Among the myriad sub-species of Oak found around the world, American White Oak stands out as the finest. CRAFT's artisans love working with American White Oak, specifically because there are so many creative and interesting things that can be done with it.

CRAFT's wood artisans love working with White Oak because of its beautifully consistent colour and grain pattern. These characteristics create a versatile canvas, allowing the CRAFT Artisan Team to skillfully apply a range of artisanal processes that transform White Oak into an array of stunning and naturally alluring colours.

CONTEMPA

MODERN, URBAN-NATURAL
WIDE PLANK OAK

The Contempa Collection exudes an unmistakable feeling of luxury and grace. Created for design conscious individuals looking for an urban-natural vibe and the right balance of casual sophistication, the Contempa Collection features American White Oak that has been artfully selected for its refined character and distinctive beauty. Contempa's wide, long planks minimize seams, preserve visual flow, and infuse a sense of pure simplicity and elegance.

NORCIA

OUR BLACK WALNUT

Origin: Eastern USA

Walnut has long been the most highly prized of the American hardwoods, and is a favourite amongst the design conscious and those who appreciate the exotic beauty of real wood.

CRAFT's artisans love working with Black Walnut because it is, simply put, great to be around something that is so beautiful.

We fully understand the enduring appeal Walnut holds for generations of craftsmen, and celebrate its widespread use by the design community for contemporary furniture, cabinetry, and flooring. Given its extensive usage, it's evident that Walnut's universal adoration will continue on for generations yet to come.

LUXE

EXOTIC, CONTEMPORARY, WIDE PLANK WALNUT

A modern aesthetic designed for urban living, the Luxe Collection features uncommonly wide 8" planks of Walnut, where each and every board is carefully chosen by our artisans to meet the highest standards of wood beauty.

DEVONSHIRE

LEGACY PLANK

TIMELESS, TEXTURED,
WIDE PLANK WALNUT

Our Legacy Plank Collection is an homage to the original craftsmen who forged their legacy building exquisite, turn-of-the-century furniture from Walnut. Legacy Plank's textural qualities and exotic grain pattern form a sophisticated look that enhances traditional and modern interiors alike. Featuring wide 8" planks, the collection's distinctly wide widths and extended lengths create a finished floor with notably fewer seams compared to a more typical narrow-width Walnut floor. This characteristic greatly contributes to the unique beauty of this American exotic, serving as a tribute to the craftsmanship of the past.

HOME TOUR craftfloor.com/tour/ferrera

FERRERA

SEGOVIA

Legacy Plank floors are created by artisans using hand-worked VintageCRAFT techniques that result in stunning time-worn textures.

FERRERA

MONTIEL

RECLAIMED HEART PINE

CRAFT's reclaimed floors feature artisan-restored Heart Pine, crafted out of century old beams and decking salvaged from historic buildings across rural America.

At CRAFT, we love working with Reclaimed Heart Pine because of its century-old patina, and because of the VintageCRAFT effects that our woodworking team achieves through a variety of artisanal techniques which add texture and distinctiveness to every plank.

RECLAIMED HEART PINE

100 YEAR OLD, GENUINE RECLAIMED HEART PINE

The incredible hardness of Reclaimed Heart Pine, combined with VintageCRAFT texturing, means that an investment in a Heart Pine floor will withstand the rigors of an active household while still looking beautiful for years to come.

Authentic features include nail holes, wood plugs and patches, and a beautiful patina that only comes with a century of natural aging.

HAYLOFT

Through the laborious and time-consuming process of restoring Heart Pine that has been reclaimed from centuries-old buildings, CRAFT's woodworking team is able to save and preserve this wonderful resource for future generations.

ACCESSORIES, OPTIONS, AND WARRANTY

MATCHING ACCESSORIES AND OPTIONS ARE AN IDEAL WAY TO ACHIEVE THE UTMOST IN DESIGN UNITY AND COORDINATION

HERRINGBONE + CHEVRON

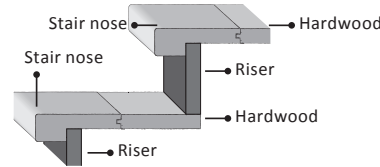

For the utmost in design flexibility, each CRAFT floor is available in wide plank Herringbone or Chevron pattern.

LONGCRAFT

LongCRAFT ten-foot planks make a home extra special by creating the look of a high-end custom floor. Order as much or as little as you please, knowing that the LongCRAFT planks will blend perfectly with standard length boxes.

STAIR NOSE

A linear moulding that attaches to the flooring along one edge and trims off a stair, or any step to a lower adjacent area.

VENTS

A more beautiful and elegant solution than standard drop-in floor vents, our finished wood vents are a perfect match and create a smooth, safe transition along the flooring surface.

COMMERCIAL FINISH

DuRa Finish Ultra Matte, CRAFT's standard residential wood flooring finish, can be upgraded to DuRa Finish Commercial, a solution which offers superior abrasion resistance for floors in a commercial application.

INSTALLATION

A CRAFT floor is suitable for a wide variety of settings, including installations over radiant floor heating. Refer to craftfloor.com/learn/resources/ for more detailed information. Although all CRAFT floors are expertly milled and very easy to install, we nonetheless recommend installation by a certified professional to achieve the best results.

THE CRAFT WARRANTY

All CRAFT products are covered by a Limited Lifetime Structural Warranty. Products with our standard DuRa Finish Ultra Matte residential finish are covered by a 30 Year Residential Finish Warranty, and products with our DuRa Finish Commercial upgraded finish are covered by a 10 Year General Commercial Finish Warranty.
